

PEMA SKYMASTER PRO

Making things easy.

PEMA SKYMASTER PRO

Programmable, digital and visual.

PEMA SKYMASTER PRO welding positioner represents a fusion of modern digitality and Pemamek's signature positioning technology. All the uniquely capable features of PEMA SKYMASTER PRO are controlled with an intelligent touch screen system.

- Optimized working positions
- Visual programming
- Improved quality
- Boosted productivity
- Hydraulic 3-axis movements
- Easy to use
- High-quality components
- World-wide PEMA service

1,750 positions

Library for positions

Library to save up to 35 work cycles and altogether 1750 positions with import and export feature.

30 seconds

Quick programming

Approximate time spent for programming one step. Easy, isn't it?

35 tons

Wide selection

Always the optimal dimensions for your production purposes. PRO series available from 750 kg up to 35,000 kg.

70 %

More productivity

Pre-programming with browser-based system makes handling significantly faster.

PRO features

Optimized for different devices

Visual interface

Add notes & descriptions

Based on WiFi

Diagnostic and maintenance

Workcycle import & export

Let's Make More - Together.

Pemamek is a family-owned global technology leader in designing and manufacturing automated welding and production solutions.

With the extensive 50-year experience in welding and production automation, Pemamek is dedicated to helping heavy fabrication industries, such as shipbuilding, wind energy, and power generation industry, to raise the level of productivity and Make More.
